

ROTARY ZONES 28-29

On July 1, 2009, the new alignment of Rotary International zones went into affect, resulting in the reconfiguration of old Zones 27-28 into Zones 28-29. Here is a map and a description of how these new assignments affect all of us.

- ***No districts left old Zone 27, now Zone 28.*** There were 11 districts in that zone. The new zone is numbered 28 and it has 12 districts. District 5580 has rejoined our zone. District 5580 includes northern Minnesota, part of northwestern Wisconsin, all of North Dakota and a section of Ontario, Canada that runs all the way north to the Hudson Bay.

- ***Three districts left old Zone 28.*** District 6540 in northern Indiana, went south. District 6330, in eastern central Michigan and includes part of Canada, is now part of Zone 24, which is largely a Canadian zone. District 7090 in upstate New York around Buffalo and included Niagara Falls in Canada, also went north to be part of Zone 24.

- ***Six districts came over from old Zone 31 to new Zone 29.*** Four of those districts are in central and upstate New York. They are districts **7130, 7150, 7170 and 7190**. They include the major cities of Rochester, Syracuse, Binghamton, etc. Two of the districts include central Pennsylvania – those are districts **7350 and 7370**. In addition, 7370 includes a portion of western Maryland and northern West Virginia.

Welcome new Districts, new Clubs, new Rotarians from North Dakota, northern Minnesota, Ontario, northwestern Wisconsin, upstate New York, central Pennsylvania, western Maryland and northern West Virginia. We are delighted and excited to have you part of the new Rotary Zones 28-29 Family.
